

The experience of flight
I was nervous but also excited
because I was about to go on
my first flight with my mum
When I soared off the cliff
I could feel my heart beating
faster than a rocket
me and mum flew just above
the ocean with our relatives
(birds) and I could taste
the salty air around me.

Home maddnes

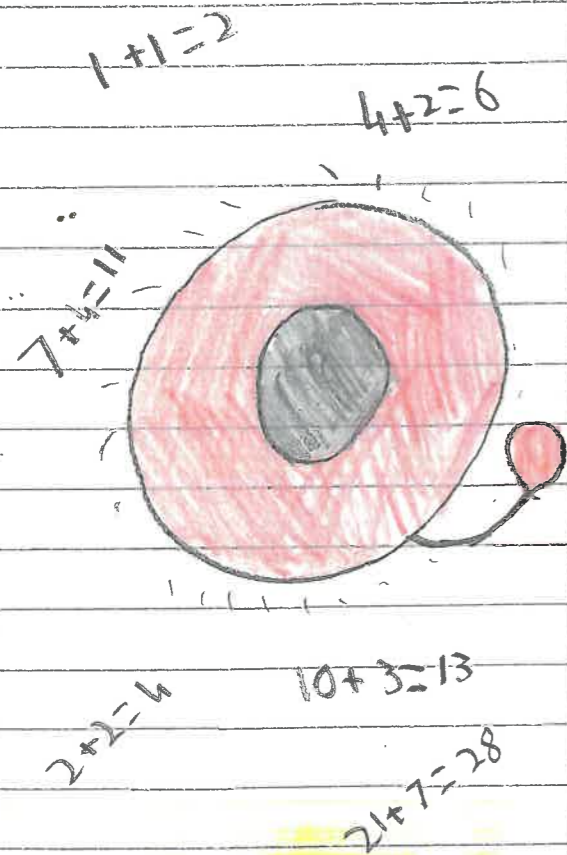

AS soon as I got home from school,
I went in my room and wept
but mum came in and tried
to calm me down "I hate my life,"
I said
"I'm just trying to help," explained
mum
"Why did I have to have these
dumb wings?" I said under my
breath she put her neckless around
my neck but I just yanked it
off
"Just get out... get out!" I
shouted.

School freak out

On my first day of school
I was really excited to
play with the other girls
but then
I tripped
triggering my wings to sprout
out big and wide
everyone laughed at me
to the other kids I was as
freaky as a snake with legs
waddling towards you and as
freaky as a shark with human
feet

I feel like my wings are demons
because they're trying to get me in

The accident

I sprouted my wings
I soared off the cliff in stress
but mum got struck hard.

I flew after her
but it was too late to do
she already fell.

I would visit her
grow to bring her flowers (notes)
but one day she rose.
